PROFESSIONAL SUMMARY

Full Stack Developer (MERN) and Computer Science undergraduate with strong foundations in Java, Data Structures & Algorithms, and REST API development. Hands-on experience building scalable web applications with authentication and cloud integration. Solved 100+ DSA problems and focused on developing efficient, real-world software solutions. Seeking a Software Developer Internship to apply technical and problem-solving skills.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Frontend: React.js, Tailwind CSS

Database: MongoDB, MySQL

Tools & Platforms: VS Code, Git & GitHub, Render, Netlify

Core Concepts: Data Structures & Algorithms, OOP,

PROFESSIONAL EXPERIENCE

Web Developer Intern | HEG Ltd

April 2025 - May 2025

Mandideep, Madhya Pradesh, India

- Developed and optimized a React.js Single Page Application (SPA) using client-side routing, enabling seamless navigation without full page reloads and delivering a smooth, responsive user experience across devices.
- Built reusable and modular UI components, improving code maintainability, scalability, and overall frontend architecture.
- Implemented secure authentication and enhanced performance through efficient state management and optimized rendering; collaborated using Git and GitHub to maintain clean code and a consistent development workflow.

PROJECTS

Airbnb Clone – Full Stack Web Application | [GitHub](#)

Nov 2025 - Dec 2025

MERN Stack, JWT, MongoDB, Cloudinary, Render

Web application that allows users to explore and manage property listings with authentication and full CRUD functionality.

- Built a full-stack rental platform supporting **500+ property listings**, enabling users to create, update, and manage listings with optimized MongoDB queries while ensuring efficient data retrieval and smooth user experience.
- Implemented **JWT-based authentication and Cloudinary integration**, ensuring secure user access while reducing media load time by ~30% and improving overall application performance and scalability.
- Applied **MVC architecture to modularize backend components**, improving code maintainability, scalability, and reducing debugging complexity across application layers.

Portfolio Website | [GitHub](#)

July 2025

React.js, Tailwind CSS, Netlify

Personal portfolio platform designed to showcase projects, technical skills, and contact information with a modern, responsive, and performance-optimized user interface.

- Developed a fully responsive web application using **React.js and Tailwind CSS**, designing a clean and modern UI with smooth navigation and consistent user experience across devices.
- Implemented **dynamic and reusable component-based architecture**, improving scalability, maintainability, and user engagement through interactive sections and seamless navigation.
- Optimized frontend performance using **lazy loading and efficient rendering techniques**, achieving ~30–35% faster load times and deployed via **Netlify CI/CD pipeline** for reliable hosting and continuous updates.

CERTIFICATIONS & ACHIEVEMENTS

- MongoDB Basics for Students** - MongoDB, Aug 2025
- Git & GitHub Certification** - CodeChef, Jan 2026
- Introduction to Git** - Microsoft Learn, Jan 2026
- C++ Programming – Institute of Technology and Management**, April 2024

EDUCATION

2023 - 2027

B.Tech in Computer Science Engineering

Institute of Technology and Management, Gwalior, Madhya Pradesh, India
